## EXPERIENCE

2022 - Present

Designer and Developer

Ascend Fundraising, Toronto

While working at Ascend I have designed and developed landing pages and websites for high profile clients with national campaigns such as Tim Horton's Foundation Camps and sports teams such as Winnipeg Blue Bombers and Boston Red Sox. I have also carried out daily updates, site upgrades, fixed issues and provided creative work. Ascend utilised my development knowledge by electing me to help the tech team repurpose and deploy a custom website that was built with VueJS and Strapi for a previous client. I have also held a workshop to train my coworkers on carrying out updates using Strapi and another workshop to demonstrate to our product team the process of Facebook and Instagram shop integration with Shopify.

2018 - Present

Full Stack Web Developer & Graphic Designer

Freelance, Remote

As a freelance developer I have built, designed, hosted and published several websites, I have also designed both digital and physical products such as posters, tshirts, logos, business cards and social media ads.

2022 (7 months)

Developer and Consultant

1-800-NUMBER, New York, USA

During my time with 1-800-NUMBER I have built a landing page, provided consultancy for a site upgrade and, helped transfer a client's site.

## EDUCATION

2017 - 2019

Diploma in Computer Programming

Sheridan College

During my time at Sheridan College I have gained valuable insight on best industry practices. I have worked on databases using SQL and MongoDB. I created business applications (MVC Framework) with Java, C# and .Net Framework. I created websites and mobile applications using HTML, CSS, JS, Angular, jQuery, PHP. I also learned to network, UI design, and so much more.

2013 - 2015

Diploma in Business Administration (Finance)

Sheridan College
