#### Objective:

Highly skilled Full Stack Web Developer and Graphic Designer with expertise in building websites, creating business applications, and providing creative solutions. Seeking a challenging position to leverage my technical skills and industry knowledge to contribute to a dynamic team.

#### Education:

Diploma in Computer Programming  
Sheridan College, Brampton, Ontario  
[2017 - 2019]

#### Work Experience:

Designer and Developer | Ascend Fundraising, Toronto  
[2022 - 2023]

- Designed and developed landing pages and websites for high-profile clients with national campaigns, some examples are Tim Horton's Foundation Camps, Winnipeg Blue Bombers, and Boston Red Sox.
- Conducted daily updates, site upgrades, bug fixes, and provided creative work.
- Repurposed and deployed a custom website built with Vue.js and Strapi for the tech team.
- Conducted workshops to train coworkers on updates using Strapi and demonstrated Facebook and Instagram shop integration with Shopify to the product team.

Designer and Developer | Freelance, Remote  
[2018 - Present]

- Developed visual identities for brands and businesses, including logos, social media content, 3D models, and animations.
- Collaborated with artists and brands to design and manufacture physical goods such as artwork for cassette tapes, vinyl records, t-shirts, business cards, event posters, hoodies, and hats.
- Created a web app using React and Three.js to render 3D models and generate optimised GIF animations for an artist portfolio site, improving user experience and reducing resource usage.

## Skills:

- Programming Languages: HTML, CSS, JavaScript, Java, C#, TypeScript, GraphQL
- Front-End Frameworks: Vue.js, Gatsby, Angular, React
- Back-End Frameworks: Strapi, Node.js
- Databases: SQL, MongoDB
- Version Control: Git, GitHub, GitKraken
- Content Management Systems: WordPress, Shopify, BigCartel, Webflow
- Graphic Design: Adobe Creative Suite (Photoshop, Illustrator, InDesign)
- Video Editing: After Effects, Premier
- 3D Design: Cinema 4D, Blender
- Sound Design: Ableton Live, Adobe Audition
- Other Tools: NFT Design and Production

## Projects:

- Developed a web app using React and Three.js to render 3D models, record animations, and output GIFs for optimised display on an artist portfolio site.
- Artwork featured on Ninja Tune Staff Picks - December 2021.
- Artwork featured on Bandcamps new and notable section.
